

About the School

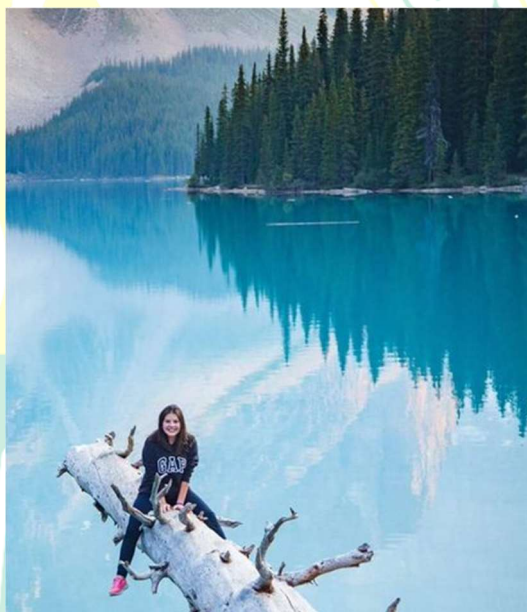

St. Mary's is a school in the heart of the city where there is something special for all students. St. Mary's provides exemplary student-centred learning in the areas of regular education, and the Extended French and International Baccalaureate programs. The St. Mary's tradition was established in 1885 and is the foundation of Catholic education in Alberta. Our students pride themselves on a long-standing tradition of academic excellence as well as success in Athletics, Fine Arts and other student led initiatives that include volunteerism and community outreach. As one of the smaller high schools in the city we are a community where long-lasting relationships are formed. We are excited to offer a well-rounded education to our students who reach their potential to be exceptional members of a global community.

Facilities

St. Mary's High School offers modern learning facilities such as a theatre, learning commons, commercial kitchen, gymnasium, fitness centre, science labs, and a cafeteria with a river view! We are just a short walk to our sister school, St. Monica, for our students to utilize the construction, fabrication, mechanics and foods labs or to offsite sport complex which is used as an additional physical education space.
